FINAL ORDER ON PETITION FOR REVIEW OF PREVAILING WAGE RATES

On January 21, 2025, the Commissioner issued Findings and an Amended Interim Order on the Petition for Review of Prevailing Wage Rates in this matter. The Findings and Amended Interim Order ("Amended Interim Order") are attached hereto as "Exhibit A" and are incorporated by reference.

In the Amended Interim Order, the Commissioner found that data submitted by Submitter X during the annual survey period failed to conform to both the law and regulations. Most notably (1) the rates submitted were computed based on an average of all rates paid to all workers, and were not rates "paid . . . to workers," as required to receive consideration in the determination; (2) Submitter X provided only a generic project description so it was not clear whether any of the work was performed under a contract or, if it was, whether that contract qualified for consideration in the survey; and (3) it was not possible to determine from the submission whether multiple survey entries had been made for work performed under the same contract.

Pursuant to the Amended Interim Order, on January 23, 2025, Submitter X provided an updated data set together with an affidavit attesting to the accuracy of its

contents, and its compliance with the terms of the Commissioner's Amended Interim

Order. A redacted PDF of the data set is attached hereto as "Exhibit B."

The Division is not in a position to conduct a comprehensive audit of Submitter X's January 23, 2025 revised submission, particularly given the expedited nature of this proceeding. The revised submission contains over 300 individual lines of data, representing rates for over 800 workers, and an audit would require not only substantial additional information from the Submitter, but a time-consuming cross-check of each data point to cross-check. Nonetheless, a spot review of Submitter X's January 23, 2025 submission was conducted to identify any obvious issues. That review found the following:

- Submissions were made for jurisdictions that were not included in the challenge process (including Allegany, Calvert, Cecil, Charles, Garrett, St. Mary's, and Washington Counties). Those submissions are beyond the scope of the issues in this case, and will not be considered.
- 2) More troubling, submissions reported rates that were out of compliance with local minimum wage law. For example, there were multiple workers whose reported wage rates ranged from \$15.70 to \$15.95 an hour in Montgomery County in October 2023, when the minimum wage in that county was \$16.70 per hour.
- 3) Comparisons of the Submitter's January 23 submission to its original, October 2024 survey submission (Exhibit 14) revealed additional cause for concern. As acknowledged by Submitter X, the rates submitted in October

2024 represented "average" rates paid in the jurisdiction. Yet, in both of the two jurisdictions for which a spot-check comparison was made (Howard and Montgomery Counties) Submitter X's revised data overwhelmingly consisted of rates that were below these previously reported averages. In Montgomery County, 39 of the 42 workers included in the revised submission were reported to have wage rates lower than the lowest average wage reported on the original submission. In Howard County, 37 of the 50 workers (three-quarters) included in the revised submission were reported to have wage rates lower than the lowest average wage reported on the original submission.

4) A comparison of the data reported for identical weeks also yielded potential inconsistencies. For example, in Montgomery County, the original submission reported that 66 workers were paid an "averaged" rate of \$19.53 per hour during the week of 10/9/23 through 10/15/23. The revised submission reports 40 workers during that same week in the same jurisdiction - all of whom, according to the revised submission, earned a rate below the "average" previously reported. Even the highest reported rate on the revised submission is more than \$2.00 per hour below the previously reported "average." In Howard County, the original submission reported 30 workers in this jurisdiction for the week of 9/18/23 to 9/24/23, with an "averaged" rate of \$17.78 per hour. The revised submission reports 23 workers in this jurisdiction for that same week, all of whom are

reportedly paid wages below the previously reported "average," with most making in the \$15.00 to \$16.00 range.

Although facially compliant with the minimum requirements set out in COMAR 21.11.11.03, the inconsistencies in the data give pause. Unfortunately, due to the expedited nature of this process, a full exploration of those issues lies beyond the scope of this proceeding. Accordingly, with the exception of the Montgomery County rates falling below that jurisdiction's minimum wage rates, the revised data provided by Submitter X on January 23 will be accepted for consideration in the recalculation of the Laborer II rates (highway category) in the nine jurisdictions.

The revised rates determined for these classifications are attached as "Exhibit C".

Pursuant to §17-211(f) of the State Finance and Procurement Article, these determinations are final and shall be the rates applicable in the localities for the remainder of the 1-year period for which they were issued under § 17-209 of this subtitle.

As provided by §17-211(f), the Commissioner has served a copy of this Final Order on Petition for Review of Prevailing Wage Rates on the public body, the Washington Suburban Sanitary Commission; the Petitioner, LIUNA (through counsel); and Submitter X. In addition, this Final Order will be posted on the Department's website.

Pursuant to COMAR 21.11.11.07(f), a party aggrieved by a final order of the Commissioner may obtain judicial review by filing a written petition with the appropriate circuit court within 30 calendar days of the issuance of this Order. See Maryland Rules,

Title 7, Chapter 200 for additional information.

FINDINGS AND *AMENDED* INTERIM ORDER ON PETITION FOR REVIEW OF PREVAILING WAGE RATES

This matter arose under the Prevailing Wage Law, State Finance and Procurement Article §§ 17-201 through 17-226, Annotated Code of Maryland. On December 24, 2024, the Philadelphia/Baltimore/Washington Laborers' District Council, and the West Virginia and Appalachian Laborers' District Council, both affiliated with the Laborers International Union of North America, AFL-CIO, (collectively "LIUNA") filed a verified petition for review with the Maryland Commissioner of Labor and Industry ("Commissioner") seeking review of the prevailing wage rates for Highway Laborer (Group II) for Anne Arundel, Baltimore, Carroll, Frederick, Harford, Howard, Montgomery, Prince George's and Oueen Anne's counties and Baltimore City as well as the Building Laborer (Group I) in Frederick County. The petition alleged that one submitter for the 2024-2025 annual prevailing wage survey had submitted fraudulent data under the subcategory of "Flagger" which resulted in a significant reduction in Laborer II rate for the aforementioned counties. Upon receipt of the petition, the

¹ The challenge to the rate in Queen Anne's county was withdrawn at the hearing.

Commissioner initiated an investigation and, pursuant to §17-211(d) of the State Finance and Procurement Article, conducted a hearing on the petition on January 15, 2025, at the Division of Labor and Industry at 10946 Golden West Drive, Hunt Valley, Maryland 21031.

EXHIBITS

At the hearing, the following exhibits were offered and entered.

Commissioner Exhibits:

<u>No.</u>	Description	<u>D</u> :	<u>ated</u>
1.	Verified Petition for Review LIUNA	12	2/16/24
2.	Letter to LIUNA re: call for bids	12	2/20/24

20.	Email Response from Submitter X (redacted)	1/13/25
21.	Responsive data from Submitter X (redacted) (native)	1/13/25
22.	Responsive data (break down by county and by week ending date) from Submitter X (redacted) (native)	1/15/25
23.	Motion filed by Submitter X to Limit disclosure Of Confidential and Personal Identifying Information	1/14/25

At Hearing Before the Commissioner on 1/15/25, with Affidavit and Exhibits (redacted)

Petitioner Exhibits:

No. Description

- 6. Informational Wage Rates for Anne Arundel County printed 1/10/24
- 7. Information Wage Rates for Baltimore County printed 1/10/24
- 8. Informational Wage Rates for Baltimore City printed 1/10/24
- 9. Informational Wage Rates for Carroll County printed 1/10/24
- 10. Informational Wage Rates for Frederick County printed 1/10/24
- 11. Informational Wage Rates for Harford County printed 1/10/24
- 12. Informational Wage Rates for Howard County printed 1/10/24
- 13. Informational Wage Rates for Montgomery County printed 1/10/24
- 14. Informational Wage Rates for Prince George's County printed 1/10/24
- 15. Informational Wage Rates for Queen Anne's County printed 1/10/24

Petitioner's Supplemental Exhibits

- 1. Baltimore City's Announcement of a Wage Survey for 2025
- 2. Baltimore City's New Wage Determinations for 2025
- 3. Prince George's County Announcement of a Wage Survey for 2025
- 4. Prince George's County's New Wage Determinations for 2025

FINDINGS OF FACT

Based on the testimony and exhibits presented at the hearing, the Commissioner finds the following facts:

The Annual Survey

- Pursuant to §17-209 of the State Finance and Procurement Article, the Commissioner of Labor and Industry is required to annually determine the prevailing wage rate for workers in each classification in each locality in the State of Maryland.
- 2. To satisfy this requirement, the Prevailing Wage Unit ("PWU") conducts an annual survey. The survey is electronic and is accessible through a portal on the Department of Labor's ("Department") website. The survey opens on September 1 each year, and submissions are accepted through October 31. (Commissioner Ex. 10)
- 3. On August 23, 2024, the former Program Manager for the PWU sent notice of the annual prevailing wage survey. (Commissioner Ex. 10)
- 4. Instructions on how to enter submissions for the survey are posted on the website together with other resources and informational materials, including FAQs, a PowerPoint presentation, and an instructional video. The instructions expressly provide that only multiple workers in the same classification and paid the same rate may be submitted as a single entry. (Commissioner Exs. 11-12)
- 5. Following the close of the survey, the submitted data was processed, and the prevailing wage rates calculated based upon the submitted data.

6. On December 3, 2024, the Prevailing Wage Unit posted the new rates on its landing page on the Department's website together with information about how to initiate a rate challenge. (Commissioner Ex. 15)

The Petition

- 7. On December 16, 2024, LIUNA filed a verified petition for review of the rate for the Highway Laborer II in Anne Arundel, Baltimore, Carroll, Frederick, Harford, Howard, Montgomery, Prince George's, and Queen Anne's counties, as well as Baltimore City as well the Laborer I (Building) classification in Frederick County. (Commissioner Ex. 1)
- 8. In its petition, LIUNA alleged that a significant decrease in the prevailing wage rate for the Highway Laborer (Group II) from the 2023-2024 survey to the 2024-2025 survey appeared to be the result of fraudulent submissions by a single submitter in the "Flagger" subcategory. Specifically, LIUNA noted that on October 21, a submitter made multiple submissions in multiple counties of rates for this classification between the hours of 8:40 a.m. and 11:29 a.m.. In many instances, the number of workers represented in the submission to have received the rate was quite high: 135, 149, 165 or 181.
- 9. The petition requested the following: (i) that the Commissioner vacate the prevailing wage rates from the 2025 survey and the prevailing wage rates for 2023-2024 for Highway Construction Laborer Group II be used during the pendency of the petition for review process; (ii) that all batch Flagger

wage data submitted on September 19, 2024 and October 21, 2024 be removed from the 2025 survey with the prevailing wage and fringe benefits recalculated in the ten identified jurisdictions; (iii) that an audit be conducted of the data in question; (iv) that an investigation be conducted of the submitter of the alleged fraudulent data or refer the matter to the Maryland Attorney General; (v) that the Building Laborer Group 1 rate for Frederick County should be vacated and replaced with the prevailing wage rate from Washington County; (vi) that the Commissioner should adopt a policy of not adjusting wage rates for any classification from a single survey by more than 10% from the prior year's prevailing wage rate or from previously established federal prevailing wage rates so the prevailing wage for Laborer Group II should not be reduced by more than 10% from the 2023-2024 prevailing wages; (vii) that if the Commissioner determines that the September 19, 2024 and October 21, 2024 wage data is not excluded, the Commissioner should publish a separate prevailing wage for the subclassification of Flagger and calculate a new prevailing wage rate for the subclassification of Laborer Group II. (Commissioner Ex. 1)

10. A petition for review is ripe when a public body issues a call for bids or proposals using the rate for which review is requested. Md. State Fin. & Proc. Code Ann. § 17-211(b).

- 11. On December 20, 2024, the Commissioner sent a letter to counsel for LIUNA requesting that it identify any call for bids issued by a public body using the rate that LIUNA was seeking to challenge. (Commissioner Ex. 2)
- 12. On December 24, 2024, LIUNA filed an amended verified petition for review of the same rates identified in its original petition, and it identified a call for bids issued by the Maryland Stadium Authority ("MSA"). (Commissioner Ex. 4)
- 13. Before a public body issues a call for bids or proposals for a public work contract, it must request a wage determination setting forth the prevailing wage rate for each classification of worker to perform work under the contract.
- 14. On December 24, 2024, the Washington Suburban Sanitary Commission ("WSSC") was issued a wage determination (determination No. 60094) for a public work project in Montgomery County using the challenged rate Highway Labor II rate. (Commissioner Ex. 5). The WSSC issued a bid solicitation for the project on December 26, 2024.
- 15. On January 8, 2025, the Commissioner sent a letter to counsel for LIUNA advising that the MSA is not a public body within the meaning of §17-211(a) of the prevailing wage law; that she was dismissing without prejudice LIUNA's challenge to the Laborer I rate in Frederick County as not ripe; and that she would be holding a hearing on the petition with

- respect to the remaining Laborer II rates on January 15, 2025. (Commissioner Ex. 6)
- 16. On January 8, 2025, the Commissioner issued a Notice of Hearing on LIUNA's challenge. The relevant parties that needed to be served under the law were served with notice. The notice was posted on the Division's website and sent to registrants in the Division's prevailing wage database through the online platform "Constant Contact." (Commissioner Exs. 7-8)

The Investigation & Hearing

- 17. Upon receipt of the verified petition, the Commissioner reviewed the submissions that LIUNA alleged in its petition to be improper. The Division determined that all submissions were made by a single submitter (hereinafter referred to as "Submitter X").²
- 18. On December 20, 2024, PWU sent an email to Submitter X advising of the rate challenge and requesting that they provide documentation supporting their survey submissions, including records of hours worked for each employee, pay records, job classification records, and documentation regarding fringe benefits. The message requested that the information be provided in a searchable electronic file. (Commissioner Ex. 16)

² Prior to the hearing, the submitter moved to forbid public reference to its company name on grounds that linking its name to the wage data submitted would result in public disclosure of confidential commercial information. After considering the arguments of the parties, the Commissioner directed that the submitter be referred to as Submitter X throughout the proceedings. The reasons for that ruling were stated on the record, and will not be repeated here.

- 19. On January 3, 2025, Submitter X sent an email with responsive data attached. (Commissioner Ex. 17)
- 20. On January 8, 2025, the Commissioner sent another letter to Submitter X requesting additional information as well as an explanation and clarification of how certain information was derived. (Commissioner Ex. 19). In particular, the Commissioner noted that the rates reported in the survey on behalf of multiple workers appeared to be average rates calculated by Submitter X based on total hours worked by all workers in a given jurisdiction during a given pay period.
- 21. On January 13, 2025, Submitter X responded to the Commissioner's further inquiry, and confirmed that average rates had been used for all submissions in the survey. Submitter X also provided an Excel spreadsheet with straight-time rates for each worker.
- 22. On January 15, 2025, Submitter X provided spreadsheets reflecting the same data submitted, but broken out by jurisdiction and pay period, and sorted by worker ID. (Commissioner Exs. 20-22)
- 23. At the hearing, counsel for the Commissioner offered the exhibits identified above.
- 24. Counsel for LIUNA offered the exhibits identified above as well as oral argument. LIUNA argued that the data submitted by Submitter X was improper and not validly submitted for the following reasons: (1) Submitter X did not submit actual rates paid to actual workers, rather, Submitter X

submitted averaged data by aggregating the wages and dividing it by the number of workers; (2) Submitter X did not identify the specific projects on which the work was performed, which LIUNA argued was required by COMAR 21.11.11.03, rather, the entries were simply uniformly identified as "underground utility work"; (3) Submitter X's submissions did not comply with the requirement of 21.11.11.03(E)(2)(a) which only permits consideration of "projects currently under construction or completed within 6 months before the date of the 60 days notice given before making the determination"; and (4) to the extent that the work was performed on underground utility projects subject to §5-503 of the Public Utilities Article, the workers were not paid the appropriate prevailing wage.³

ANALYSIS

On review of the data provided by Submitter X and the arguments raised by LIUNA, the Commissioner agrees with LIUNA that the data submitted by Submitter X was improper in form, content and in the manner in which it was submitted. The data submitted by Submitter X was aggregated. The text of Section 17-208 of the Maryland Prevailing Wage Law, clearly speaks of calculation of the rates based on the percentage of "workers" receiving the rate. *See, e.g.*, Section

³ Section 5-305 of the Public Utilities Article has a long and complicated legislative history. In light of the decision and order excluding the submitted data on grounds of nonconformity with Section 17-208 of the State Finance and Procurement Article and COMAR 21.11.11.03, there is no need to reach this alternative argument for exclusion.

17-208(b)(1)("[t]he prevailing wage rate for straight time for a worker is the rate paid . . . (iv) to 50% or more of the workers in the worker's occupational classification"); (c)(1)("If fewer than 50% of the workers in the locality working in the same classification receive the same wage rate: (i) the prevailing wage rate shall be the rate paid to at least 40% of those workers; or (ii) if fewer than 40% receive the same wage rate, the rate shall be a weighted average rate . . . " Further, the instructions on how to participate in the survey provide that a submitter may only submit an entry for more than one worker if all of the workers whose information is part of the entry receive the identical hourly wage rate and fringe amounts. (Commissioner Exs. 10 & 12.) The survey also requires that a submitter identify the specific project on which the work was performed. That provision, as counsel for LIUNA noted, is to avoid multiple entries by the same contractor for the same classification on the same project. Accordingly, simply identifying the work as "underground utility work" is not sufficient.

In addition to requiring submissions of wage and fringe rates paid to individual workers on individual projects, COMAR 21.11.11.03(E)(2) also places certain temporal limitations on the data that may be considered.

As provided in subsection (E)(2)(b), any payroll information submitted must be for work performed within the 12-month period prior to the September 1 opening of the survey (60 days prior to the making of the wage determination), i.e., the period September 1, 2023 through August 31, 2024. *See also* Commissioner Ex. 10.

Additionally, COMAR 21.11.11.03(E)(2)(a) provides that only wage information "concerning projects currently under construction or completed within 6 months before the date of the 60 days notice given before making the determination [i.e., the 6 months preceding the opening of the survey, March 1 through August 31, 2024] shall be considered." In addition, to ensure that the data submitted is representative and to avoid duplication resulting from multiple submissions of data for a classification from the same project, the survey instructions and practice require submitters to choose a single payroll period during performance of the qualifying project for which to submit data for a given classification.

The data in this case raises the question of when a project is "completed" or still "under construction" in the context of contracts, such as "on call" or "as needed" contracts that require performance of multiple discrete jobs under a master agreement. Submitter X has described itself as a provider of short-term traffic control services. (Commissioner Ex. 23 (Affidavit)). According to its submission, these services are provided at varying locations in Maryland in support of underground utility work performed by contractors on behalf of utility companies. It is not clear from the submission whether this work is performed under a master agreement. However, when master contracts are subject to the prevailing wage law, they are treated as a single contract for purposes of compliance, such as submission of certified payroll data, and for purposes of accepting survey data. In the latter regard, that means (1) that the contract must

be ongoing or have terminated within the 6 month period of March 1 through August 31, and (2) that a submitter wishing to submit data for the survey for work performed under that contract must select a <u>single</u> payroll period for each classification and submit data for only that period.

Submitter X's survey submission must comply with these requirements as well. As only generic project information was provided for each entry submitted by Submitter X, it is not clear from the face of these submissions which work was performed under which contract, and whether that contract was ongoing at the time of the survey submission or whether it had been completed within the 6-month window. Further, it was not possible to determine whether multiple survey entries had been made for work performed under the same contract.

LIUNA argues that the data submitted by Submitter X is so deficient in both form and content that it must be discarded in its entirety and the rates recalculated accordingly. The Commissioner finds that completely discarding Submitter X's data is too draconian a measure. The survey relies on voluntary submissions of valid, conforming data. The greater the participation by the contracting community, the more reflective of practice the determined rates will be. Accordingly, the Commissioner concludes that Submitter X should be given an opportunity to swiftly cure the deficiencies in its submissions to comport with the requirements of the annual survey.

FINDINGS AND ORDER

Upon consideration of the evidence and the arguments raised, the Commissioner finds as follows:

- 1. The data submitted by Submitter X failed to conform with the statute and COMAR, in that the rates submitted were computed based on an <u>average</u> of all rates paid to all workers, and were not rates "paid . . . to workers," as they must be to receive consideration in the determination.
- 2. It is not clear whether the data submitted by Submitter X conforms to COMAR Section 21.11.11.03(E)(2)(a). As only a generic project description of "underground utility work" was provided for each entry, it is not clear from the face of the submissions whether any of the work was performed under a contract or, if it was, whether that contract qualified for consideration in the survey, i.e., was ongoing at the time of the survey submission, or completed within the 6-month window. Further, it was not possible to determine whether multiple survey entries had been made for work performed under the same contract. Only one survey submission may be made for each contract.
- 3. The data submitted by Submitter X materially affected the prevailing rates, as a significant number of the workers counted for purposes of

- determining the rate for the Laborer II group in the highway category in each county were submitted by Submitter X.
- 4. Although the data submitted by Submitter X does not conform with the requirements for survey submissions and may not be used in determining the rates, the Commissioner finds that Submitter X should be permitted an opportunity to resubmit data. The Commissioner has considered LIUNA's argument that the Submitter, evidently a large company based on the number of workers reported, failed to follow clear instructions in submitting its data, and should not be permitted to resubmit. The Commissioner finds that this sanction would not serve the purposes of the survey process. The survey benefits from inclusion, not exclusion, of valid data. If Submitter X can provide conforming data, and can do so within the extremely short timelines provided by the challenge process, then that data should be considered in recalculating the rates.

Accordingly, it is ordered as follows:

- 1. All data entered by Submitter X during the annual survey will be excluded from the data set upon which the rates are determined.
- 2. Submitter X is permitted until no later than 9 a.m. (Eastern) on Thursday, January 23, 2025, to provide a submission that complies with the terms of this Order:

- a. Submitter X may not provide data for any classification of worker for which it did not previously provide data during the annual survey period, nor for any category of work, nor for any jurisdiction that it did not previously provide data during the annual survey period.
- b. The data shall be provided on the attached Excel template. It must be sent by electronic mail to counsel for the Commissioner, Sarah Harlan, Jenny Baker, and Catherine Bellinger.
- c. All fields on the template, other than Column N (Project Value), must be filled out for each survey entry.
- d. If the work was performed under a master arrangement of any kind, including a master contract, the beginning date of the term of that arrangement or contract should be provided under the "Project Start Date" field (Column F), and if that arrangement or contract has ended (or been renegotiated), the date of its termination should be provided in the "Completion Date" field (Column H). The "Project Name" field (Column I) should contain the name of the contract and the contract number (or if there is not a contract number, equivalent identifying information). If work was performed under the master during the selected week at multiple locations within the jurisdiction, the "Project Address" field (Column J) should so indicate, and a list of those locations should be maintained for verification. In that case, Column L ("Zip Code") need not be supplied. The "Project

- Description" column (Column O) should include a brief description of the scope of work of the master arrangement and should identify the contracting parties.
- e. If the work performed was an individual project, and was <u>not</u> performed under a master arrangement or contract, the "Project Name" field should contain the order number or other unique identifying information; the "Project Address" field should provide the address of the project; the "Zip Code" field (Column L) must be filled out; the Project Start Date and Completion Date for the individual project should be identified; and the "Project Description" should include a brief description of the scope of work and should identify the contracting parties.
- f. Only a single submission, representing a single payroll period, may be made for each project for work performed in the jurisdiction. If a project spanned multiple jurisdictions, only a single submission representing a single payroll period may be made for each jurisdiction in which work was performed.
- g. Column V, "Number of Workers," must reflect only the number of workers performing work on the project during the selected pay period in the selected jurisdiction who were actually paid the identical wage and fringe rates. No average rates are permitted. Further, only the straight-time rate actually paid should be listed in

Column T ("Hourly Wage"), and Column V should reflect only the number of workers actually performing the work of their classification on the project during the selected pay period (i.e., not workers who were paid for training, orientation, travel, vacation, holiday or other non-work time).

- h. The data submission must be accompanied by a sworn affidavit by a person with knowledge attesting to the accuracy of its contents, and its compliance with the terms of this Order.
- i. Submitter X must maintain all documentation and records supporting its revised submission, and have that information promptly available for inspection by the Division.
- 3. Upon receipt of the requested information, the Division will review the submission for accuracy and compliance with the terms of this Order and, if appropriate, order any conforming data to be considered in recalculation of the Laborer II rate (highway category). Any nonconforming data will not be considered in the recalculation of the rates.
- 4. Revised rate determinations will be issued on or before January 27, 2025.

 The revised rates will be uploaded into the prevailing wage system, and will be posted, in Excel format, on the prevailing wage website landing page.
- 5. It is iterated that any resubmission of data by Submitter X will be considered for inclusion in calculating the revised rates only to the extent

that the data strictly conforms with this Order, and is submitted no later than 9:00 a.m. on Thursday, January 23, 2025 as provided in this Order.
